Rehamtareq490@gmail.com | +962 77 604 2425 | Amman, Jordan

Professional Summary

Software Engineering graduate with hands-on experience in backend development, manual QA testing, UI testing, and UI/UX design. Experienced in developing RESTful APIs, implementing business logic, and testing web applications through functional, UI, API, and regression testing. Currently preparing for the ISTQB CTFL certification while strengthening my skills in software quality assurance, Postman, Jira, and secure software testing. Passionate about building reliable, secure, and high-quality software solutions.

Experience

Graphic Designer SWETER Team	1 year
Graphic Designer IT Zone Team	1 year
Graphic Designer IEEE HU RAS	3 mon

- Designed social media posts, event promotions, and branding materials for student and technical communities.
- Created visual content using Canva, Figma, and Adobe Illustrator to enhance engagement and strengthen brand identity.
- Collaborated with multidisciplinary teams to deliver creative and user-focused design solutions.
- Contributed to event marketing campaigns, technical workshops, and community initiatives through visual design.
- Developed communication, teamwork, time management, and project coordination skills while working in student organizations.

Projects

CVision (Software Tool for Smart Team Role Assignment) | Graduation Project Team Leader

- Led a multidisciplinary development team.
- Developed backend functionalities using Python.
- Designed and managed PostgreSQL and MySQL databases.
- Integrated Google Gemini API.
- Developed and documented RESTful APIs using Swagger.
- Contributed to project documentation and UI/UX design.

E-Commerce Website | Backend Developer & QA Tester

- Developed and maintained backend functionalities using Laravel and RESTful APIs.
- Implemented business logic for products, categories, brands, orders, authentication, and user management.
- Worked with MySQL database design and API integration.
- Performed manual functional, UI, and API testing using Postman.
- Designed and executed positive, negative, and edge-case test scenarios.
- Identified and reported business logic issues related to pricing, discounts, and order calculations.
- Detected authorization vulnerabilities, validation issues, localization inconsistencies, and UI defects.
- Documented bugs with clear reproduction steps, expected results, actual results, severity, and business impact.
- Collaborated with the development team to verify fixes through regression testing.

Utado – Music Social Platform | Full-Stack Developer

- Contributed to the development of a Letterboxd-inspired social platform for music lovers built with **Next.js, Node.js, Express, TypeScript, PostgreSQL, and Redis**.
- Developed and maintained RESTful APIs and backend modules using **Node.js** and **Express**.
- Implemented authentication and authorization using **JWT access and refresh tokens**.
- Worked with **PostgreSQL** database design, migrations, and data management.
- Contributed to features including ratings, reviews, user profiles, social interactions, playlists, search, and personalized feeds.
- Participated in debugging, testing, and validating application functionality throughout the development lifecycle.
- Collaborated using Git and followed a modular full-stack architecture.

Certifications & Training

- ISTQB Certified Tester Foundation Level (CTFL) – In Progress
- Cyber Warriors Training – National Cyber Security Center (NCSCJO)
- Introduction to Python Certificate – Pioneers Academy
- Biomedical Simulation Using Unity 3D Training – BioMed Squad
- Arduino 99 Training – IEEE RAS BAU

Core Skills

Programming: Java, Python, C#, C++, PHP, TypeScript

Frontend: HTML5, CSS3, JavaScript, React (Basic), Next.js (Basic), Responsive Design, Accessibility

Backend Development: Laravel, Node.js, Express.js, RESTful APIs, Swagger/OpenAPI, Authentication & Authorization (JWT), Business Logic Implementation, Google Gemini API Integration

Databases: PostgreSQL (Neon), MySQL

UI/UX Design: Figma, Canva, Adobe Illustrator

Software Analysis & Design: UML Diagrams, Requirements Analysis, Use Cases, Alternative Flows, Technical Documentation

QA & Testing: Manual Testing, Functional Testing, UI Testing, API Testing (Postman), Regression Testing, Exploratory Testing, Test Case Design, Bug Reporting & Documentation, Basic Security Testing (OWASP Awareness), Basic SQL Validation

Tools: Postman, Git, GitHub, Jira (Beginner), Trello, Swagger, Chrome DevTools

Web Concepts: User-Centered Design, Usability, Aesthetic Interfaces

Learning: JavaScript, React, Frontend Frameworks, ISTQB CTFL

Soft Skills: Team Leadership, Problem Solving, Analytical Thinking, Attention to Detail, Communication, Adaptability, Continuous Learning

Education

Bachelor of Software Engineering | Hashemite University | GPA: 3.29 2022 – 2026

Languages

Arabic: Native | **English:** B2 Level
